Professional Summary

Results-driven Senior DataOps & Full Stack Engineer with 4+ years of experience architecting and operating large-scale data infrastructure, real-time streaming pipelines, and cloud-native applications. Deep expertise across the full data engineering stack — from ingestion with Apache Kafka and NiFi, through processing with Apache Spark and Airflow, to production-grade API delivery via Spring Boot and Kubernetes. AWS Certified Cloud Practitioner with hands-on experience across a broad range of managed cloud services. Additionally trained in AI Engineering with practical knowledge of LLM application development using LangChain, Hugging Face, and the Claude API.

Experience

Senior DataOps Engineer — Safaricom PLC

Aug 2023 – Present | Addis Ababa, Ethiopia

Lead DataOps engineer operating across a hybrid cloud environment, responsible for designing and maintaining mission-critical data infrastructure spanning on-premises Hadoop clusters and AWS cloud services.

- Designed and implemented scalable data pipelines for high-throughput ingestion, transformation, and delivery across on-premises and AWS environments.
- Developed and deployed production-grade REST APIs using Spring Boot, orchestrated and auto-scaled via Kubernetes.
- Optimized big data environments (Hive, HBase, Phoenix, Spark) to sustain high performance and horizontal scalability.
- Managed a broad suite of AWS services — S3, Redshift, DynamoDB, RDS, Kinesis, EMR, Glue, DMS, and Athena — for cloud data management and analytics workloads.
- Established and enforced code quality standards through unit test authorship and collaborative code reviews.

Technologies: Java, Groovy, Python, Spring Boot, Apache Spark, Apache Kafka, Apache Airflow, Apache NiFi, Hive, HBase, Phoenix, Hadoop, PostgreSQL, Oracle, SQL, Git, GitLab CI/CD, Docker, Kubernetes

AWS: S3, Redshift, DynamoDB, RDS, Kinesis, EMR, Glue, DMS, Athena

Automation Engineer / Data Engineer — Huawei Technologies

Apr 2022 – Aug 2023 | Addis Ababa, Ethiopia

Key engineering contributor on a distributed telecom alarm monitoring system integrating third-party vendors (Huawei, Nokia) via CORBA interfaces. The platform runs on a private cloud with virtualized infrastructure and delivers real-time alerts via SMS and email.

- Built and maintained ETL pipelines using Apache Spark and Airflow for reliable batch and streaming job execution.
- Engineered fault-tolerant data storage on Apache Hive backed by Hadoop HDFS for large-scale data persistence.
- Developed REST APIs enabling communication between distributed system components and vendor integrations.
- Ensured high availability through proactive service management, resource monitoring, and rapid incident resolution.
- Maintained code quality via structured code reviews and unit testing; resolved production issues in collaboration with cross-functional teams.

Technologies: Python, Apache Spark, Apache Airflow, Apache Hive, Hadoop, MySQL, Docker, Kubernetes, JavaScript, Shell Scripting (Linux), REST API, JSON

Mobile Application Developer — BeU Delivery

Nov 2021 – May 2022 | Addis Ababa, Ethiopia

Collaborated with a cross-functional team of engineers and UI/UX designers to build and ship BeU Delivery — a food and goods delivery platform live on both the Apple App Store and Google Play Store.

- Developed a cross-platform Android and iOS mobile application using Flutter and Dart.
- Integrated multiple third-party services and REST APIs for ordering, payments, and real-time delivery tracking.
- Authored unit test cases to validate core application flows and ensure release stability.
- Managed the full release lifecycle, including publishing and versioning on Google Play Store and Apple App Store.

Technologies: Flutter, Dart, Firebase, REST APIs, Git

Education

B.Sc. Software Engineering

Addis Ababa Science and Technology University (AASTU) | 2017 – 2021 | GPA: 3.72 / 4.0

- Teaching Assistant — Intro to Programming & Client-Side Web Development

Data Science Program (13 Months)

ALX Africa

- Machine learning, statistical analysis, data engineering, Python data stack (Pandas, NumPy, Scikit-learn)

AI Engineering Program

10 Academy

- LLM application development, LangChain ecosystem, AI agents, RAG systems, prompt engineering

Certifications

Certification	Issuer
AWS Certified Cloud Practitioner	Amazon Web Services

Technical Skills

Area	Skills
Languages	Java, Python, JavaScript, Groovy, Dart, SQL, Bash
Big Data	Apache Spark, Kafka, Hadoop, Hive, HBase, NiFi, Airflow, Flink
Back-End	Spring Boot, Node.js, Express.js, REST API design
Databases	PostgreSQL, MySQL, MongoDB, Oracle, HBase, DynamoDB
Cloud (AWS)	S3, Redshift, EMR, Glue, Kinesis, Athena, RDS, DMS
AI / LLM	LangChain, Hugging Face, Claude API, RAG, Prompt Engineering
DevOps	Docker, Kubernetes, Git, GitLab CI/CD, Linux
Mobile	Flutter, Dart, Firebase, App Store & Play Store release
